

GM Recycling

seeks a

TECHNICAL SUPPORT SPECIALIST

➤ WHAT WILL YOUR DUTIES LOOK LIKE?

- Assist customers with ordering parts and scheduling depannages.
- You are the intermediary between technician and customer. You provide support to our technicians by preparing the necessary work materials and provide technical support during inside and outside service interventions.
- Administer incoming deliveries, pickups and shipments and register them in the system.
- The administrative handling of work orders and warranty claims are also part of your duties.

In short: You are the important link between customers, suppliers and technicians!

➤ WHO ARE YOU?

- Graduated in a direction electromechanics, hydraulics, mechanics or electronics. Preferably with several years of experience in a technical environment or in the field, but this is certainly not a must!
- Ability to read electrical and hydraulic diagrams.
- Dutch-speaking and a real Englishman, avec connaissance de base du français.
- Stress resistant, customer friendly and service oriented.
- Independent, but also a team player.
- Driver's license B with own transportation.

➤ WHAT WE OFFER YOU?

- You will find yourself in a young and dynamic working atmosphere with a team of experienced and motivated employees with room for initiative.
- We have a hands-on mentality and short lines of communication.
- You can count on a competitive salary package that recognizes your already acquired knowledge and experience.
- A full-time, fixed contract for an indefinite period of time (possibly after an interim).

Do you have a passion for recycling machines and fancy a varied and challenging job within a stable and ambitious family company? Do not hesitate and react now!
